Office Action Summary

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 4, 5 and 9 are rejected under 35 U.S.C. 102(a) as being anticipated by Mauer et al. Mauer et al disclose a process for pasteurizing meat products, the process comprises the step of heating the meat products to a temperature in the range of between 195°F to 200°F to substantially eliminate any bacterial contamination within the meat products without adversely affecting their appearance and quality.

Claims 2, 3 and 6-8 are objected to as being dependent upon a rejected base claim. Claim 2 would be allowable if rewritten in independent form including all of the limitations of the base claim.

Claims 10-22 are allowed.

The Wagner et al patent is cited to show an infrared tunnel oven for cooking of food products by infrared radiant energy.
